Charles Block

Education

2022-Present **Ph.D. Computer Science**, *University of Illinois*, Urbana-Champaign NSF Graduate Research Fellow, advised by Dr. Josep Torrellas. Research topics include computer architecture and distributed systems.

- 2022-2024 M.S. Computer Science, University of Illinois, Urbana-Champaign
- 2018-2022 B.S. Electrical & Computer Engineering with Honors, University of Texas, Austin

Industry Experience

| Summer 2024 | Apple Inc, CPU Architecture/Performance Intern Investigated novel memory ordering techniques and their impact on next-generation CPUs. Developed enhancements to trace-based performance simulators and tooling. Identified and addressed performance simulation bugs to accurately model RTL. |
|--------------|--|
| Summer 2022 | Intel Corporation, Design Validation Intern Supported CPU validation in the Advanced Architecture Development Group. Debugged core RTL & software infrastructure to address performance and power issues. Improved run-time performance of long- and often-running validation jobs by 20x. |
| Summer 2021 | Microsoft Corporation, Software Development Intern (Azure) Initiated development of a distributed service to supplement PostgreSQL databases. Developed a new distributed, in-memory storage backend for PostgreSQL. Developed software using the C and Rust programming languages. |
| | Amazon Robotics, Firmware Development Intern Supported firmware development for the Amazon Scout robotics project. Integrated various sensors, MCUs, and SoCs using both embedded Linux and bare-metal C. Developed/evaluated a real-time object detection and tracking system on an embedded SoC. |
| Summer 2018 | TyRex Group, LTD, Engineering Intern |
| | Academic & Leadership Experience |
| 2023-Present | i-acoma Group at UIUC, Graduate Researcher O Working with Professor Josep Torrellas on HPC architectures and distributed systems. O Current work involves supercomputer-scale distributed algorithms for sparse matrix kernels. |
| 2021-2022 | Lu Research Group at UT Austin, Research Assistant Worked with Professor Nanshu Lu to develop wearable low-power biomedical sensors. Developed measurement circuitry for experiments with novel pressure sensor technology. |
| 2018-2022 | Longhorn Racing - Solar Vehicle Team Served as Chief Engineer and Electronics Lead at various points. Oversaw manufacturing of composite materials, electronic systems, and structural components. Developed embedded hardware and software components for control and power systems. Developed lessons & mentored other members in designing hardware and software systems. |
| | Intro to Embedded Systems at UT Austin (EE319K), Teaching Assistant |
| 2020 & 2021 | $_{\odot}$ Assisted in teaching and lab supervision for a freshman embedded systems course. |

Awards

- 2022 NSF Graduate Research Fellowship, National Science Foundation
- 2022 Wing Kai Cheng Fellowship, University of Illinois Urbana-Champaign
- 2020 & 2021 Dr. Ariane L. Beck and Mr. Eric Sebesta Endowed Scholarship, UT Austin ECE

Relevant Coursework

- Machine Learning for Compilers & Architecture (Charith Mendis, UIUC)
- Parallel Computer Architecture (Josep Torrellas, UIUC)
- Microarchitecture (Yale Patt, UT Austin)
- System-on-Chip Design (Andreas Gerstlauer, UT Asutin)
- ML Algorithm & Hardware Co-Design (Mattan Erez & Michael Orshansky, UT Austin)
